LING 290
Constructed Languages - Theory and Typology

Spring 2021
Professor Brian Hsu
Tuesdays and Thursdays: 12:30-1:45
Instruction mode: Remote synchronous
Prerequisite: LING 101 or instructor’s permission

This course explores linguistic properties of constructed languages (conlangs). We will investigate the philosophical and creative motivations behind existing conlangs, and examine how their grammatical properties relate to those of natural languages. During the semester, each student will plan and create key portions of their own conlang grammar.
